"Teddy bears working on new AI research on the moon in the 1980s"

PLAN FOR TODAY:

- user testing pairs, 4 rounds
- debrief
- code upload: workshop
- discuss next week

USER TESTING ROUNDS:

- Set-up, context, consent for notes
- Observe your partner
- Ask your questions
- Switch: open up, "user" can ask questions

15 minutes, ⚡ - I will give you 10 and 5 minute markers

CODE UPLOAD, WORKSHOP:

- Work in pairs
- Github accounts, git download
 - Share Github e-mails/user names in Discord to get this started!
- Terminal!
- IF Google Colab, shareable-link: create .md file
- IF issues, try internet GUI

NEXT WEEK: ASYNCHRONOUS!!

- Oct. 24th = NO IN-PERSON CLASS
- NO IN-PERSON CLASS = Oct. 24th

NEXT WEEK: ASYNCHRONOUS!!

- NOT A BREAK!!

NEXT WEEK: ASYNCHRONOUS!!

- Assignment will be posted this Friday 21st, to be completed **before** next in-person class Oct. 31st
- It will be Discord and most likely Github, commenting on each others' code and sharing posts in channels we have not used (**#debug**)
- Remember we are not having 2.5 hours of class; **this is more time to work on your project** in a different way next week

NEXT WEEK: ASYNCHRONOUS!!

- Much to synthesize! User testing notes, what's working, what's not (yet)
- Prototype Plan #2: due end of class Oct. 31 🧛
- After this plan, you have 6 more weeks to build your final prototype
